

Sergio Alberto Dominguez

AUTHOR DATE 2026-09-04

Senior Cloud Infrastructure Engineer · Production Operations · IaC

San Luis, Argentina Email: dominguez-sergioa@hotmail.com · Phone: +54 9 11 3135-3129 LinkedIn: <https://www.linkedin.com/in/sergio-alberto-dominguez-8a176546/> · GitHub: [\[tu-url-github.com\]](https://github.com/tu-url-github.com)

Professional Summary

Senior Cloud Infrastructure Engineer with **15+ years** of experience operating production and UAT environments at scale. Currently supports **30+ production environments** running **~190 servers and ~120 virtual machines** for multiple insurance clients at Charles Taylor InsureTech. Hands-on with **AWS** (Cloud Practitioner certified) and **Azure** (AZ-900 certified, AZ-104 in progress), Terraform / AWS CDK / Pulumi / CloudFormation, Docker, Kubernetes, Linux, Windows Server, and ServiceNow-based change management. Complements day-to-day ops with infrastructure code review work for AI agent evaluation pipelines (Revelo), auditing Terraform / CloudFormation / AWS CDK submissions for correctness, security, and evidence quality. Strong written communication; comfortable owning runbooks, post-incident documentation, and cross-team coordination across multiple client environments.

Key Achievements

- Operational support and change management for **30+ production environments** and **~190 servers / ~120 virtual machines** across multiple insurance clients.
- Reviewed **Infrastructure-as-Code submissions** across AWS CDK, Terraform, Pulumi, and CloudFormation, validating VPC, RDS, Lambda, SQS, EventBridge, Step Functions, API Gateway, and IAM patterns.
- Designed **20+ AI benchmark task families** covering Linux hardening, MVCC, LSM-trees, BM25/MinHash ranking, and TypeScript CLIs (Revelo).
- Coordinated incident response and change management across multiple client environments with rigorous documentation practices.

Relevant Work Experience

Charles Taylor InsureTech — Client Service / Cloud Infrastructure Engineer

San Luis, Argentina | Aug 2016 - Present (10 years)

- Implement cloud solution changes for multiple Charles Taylor clients in **production and UAT environments**.
- Contributed to installation, administration, monitoring, and support of approximately **190 servers** across client environments.
- Responsible for operational support of **30+ production and UAT environments**, including around **120 virtual machines**.
- Provide **troubleshooting, incident response, technical documentation, and environment-specific guidance** for client infrastructure.
- Coordinate change-management processes, post-incident reports, and runbooks across multiple client environments.
- Work with cloud services, Windows/Linux servers, **ServiceNow** workflows, storage services, monitoring tools (AWS CloudWatch), and production change processes.
- Mentor junior engineers and client-side stakeholders on environment-specific procedures.

Revelo — AI Training / Terminal Task Developer & Technical Evaluator

Freelance / Remote | 2026 - Present

- **Audited Infrastructure-as-Code submissions** for the IaC Audit V3 program: reviewed problem statements, proposed solutions, unit/integration tests, execution logs, and evidence quality across AWS CDK, Terraform, Pulumi, and CloudFormation.
- Reviewed AWS architecture patterns involving VPC networking, RDS PostgreSQL, S3, Lambda, SQS, EventBridge, Step Functions, API Gateway, AWS Backup, VPC Endpoints, and scoped IAM policies.
- Produced **evidence-based review feedback** with detailed reasoning for acceptance or failure decisions.
- Designed and validated Terminal-Bench 2.0 tasks spanning Linux hardening, MVCC isolation, LSM-tree storage, BM25/MinHash ranking, hermetic build graphs, and sparse linear algebra pipelines.
- Validated benchmark quality using oracle correctness, coverage, complexity, and long-horizon validators.

Ser Beef S.A. — Help Desk L2 / Infrastructure

San Luis, Argentina | Nov 2010 - Mar 2015

- Administered **Windows Server and Active Directory** environments.
- Managed **MySQL and Microsoft SQL Server** databases for operational systems.
- Maintained **LAN/WAN/Wi-Fi networks**, desktop PCs, printers, storage devices, and UPS equipment.
- Coordinated with external suppliers and supported business users across infrastructure incidents and service requests.

Previous Experience

- **Dell — On-Site Technical Support**, San Luis, Argentina | Mar 2009 - Nov 2010
- **Universidad de La Punta — Technical Support**, San Luis, Argentina | Feb 2007 - Mar 2009

Technical Skills

Cloud & Infrastructure: AWS, Azure, Azure AD, Azure VM, Blob Storage, Docker, Kubernetes, Cloudflare Tunnel, Traefik, Nginx, Linux (RHEL/CentOS/Ubuntu), Windows Server **IaC & Automation:** Terraform, AWS CDK, Pulumi, CloudFormation, IAM, VPC, RDS, Lambda, S3, SQS, EventBridge, Step Functions, API Gateway **Programming & Scripting:** Python, Bash, PowerShell, TypeScript, SQL **Operations & SRE:** ServiceNow, AWS CloudWatch, incident response, change management, post-incident documentation, runbooks, observability fundamentals, disaster recovery planning, BCP **Data:** PostgreSQL, MySQL, MS SQL Server, SQLite, Redis **Quality:** pytest, infrastructure code review, technical audits, evidence-based reviews

Certifications & Training

Completed:

- AWS Certified Cloud Practitioner
- Microsoft Certified: Azure Fundamentals (AZ-900)
- Microsoft 365 Fundamentals (MS-900)

In progress:

- AZ-104: Microsoft Azure Administrator (planned completion: [mes/año])

Additional training: DevOps Essentials, Azure Policy, Kubernetes for IT Administrators (LinkedIn Learning)

Education

National University of San Luis Computer Engineering — In progress

Languages

- **Spanish:** Native

- **English:** A2 (reading technical documentation; conversational proficiency in active development)
- **Portuguese:** Basic

What I bring to a senior cloud / ops role

- **Operational maturity from running real production at scale** — not just lab environments.
- **laC rigor** — review and write Terraform/CDK/CloudFormation with security and evidence in mind.
- **Documentation discipline** — runbooks, post-mortems, environment guides for both technical and non-technical audiences.
- **Cross-client coordination** — comfortable juggling multiple stakeholders and change windows.
- **AI-aware** — bonus capacity to evaluate AI-generated infrastructure code, which is becoming a daily reality for ops teams in 2026.
